

Thermowell For sanitary applications Model TW61, for orbital welding

WIKA data sheet TW 95.61

for further approvals
see page 5

Applications

- Sanitary applications
- Food and beverage industry
- Bio and pharmaceutical industry, production of active ingredients

Special features

- Materials and surface finish quality in accordance with the standards of hygienic designs
- Self-draining
- Minimised dead-space
- For orbital welding

Fig. left: G 3/8 thread for model TR21-B

Fig. right: M24 threaded connection for model TR22-B

Options: Sealing combination at neck tube

Description

The patented thermowell model TW61 (patent, property right registered under no. DE 102010037994 and US 12 897.080) is used to adapt a model TR21-B or TR22-B resistance thermometer to the process and to protect the sensor from harsh process conditions.

To integrate it into the process, the thermowell is directly orbitally-welded into a pipeline. The connection ends are smooth and prepared for orbital welding.

The measuring insert can be withdrawn together with the connection head. This makes it possible to calibrate the thermometer with the entire measuring chain, on-site, without disconnecting the electrical connections. In addition, this avoids having to open the process, and thus the risk of contamination is minimised.

In combination with a model TR22-B resistance thermometer, the rotatable threaded connection of the connection head or the display can be loosened and turned to the desired orientation.

Specifications

Designs

- Flow-through housing
- Angular housing

Nominal width of pipe

Pipe classes per DIN, ISO and ASME BPE, see dimension tables

Pressure ratings

See table of dimensions

Permissible temperature ranges

- Ambient -40 ... +85 °C
- Medium -50 ... +150 °C

Materials

- Pipes per DIN 11866 row A (metric) and DIN 11866 row B (ISO)
wetted parts: stainless steel 1.4435
- Pipes per DIN 11866 row C (ASME BPE)
wetted parts: stainless steel 316L
- Special materials on request

Surface roughness of wetted parts

- Pipes per DIN 11866 row A (metric)
Standard: $R_a < 0.8 \mu\text{m}$
Option: $R_a < 0.8 \mu\text{m}$ electropolished
- Pipes per DIN 11866 row B (ISO)
Standard: $R_a < 0.8 \mu\text{m}$
Option: $R_a < 0.8 \mu\text{m}$ electropolished
 $R_a < 0.4 \mu\text{m}$
 $R_a < 0.4 \mu\text{m}$ electropolished
- Pipes per DIN 11866 row C (ASME BPE)
Standard: $R_a < 0.51 \mu\text{m}$ (SF1)
Option: $R_a \leq 0.76 \mu\text{m}$ electropolished (SF3)
 $R_a < 0.38 \mu\text{m}$ electropolished (SF4)

Connection to thermometer

Model TR21-B: G 3/8 male

Model TR22-B: M24 x 1.5 rotatable male nut

Thermowell diameter

$\varnothing d = 4.8 \text{ mm}$

Neck tube length M

For assembly with a resistance thermometer, the neck tube length, M (see tables) is matched to the following insertion lengths

- Model TR21-B to the insertion length (A length) of 60 mm
- Model TR22-B to the measuring insert length of 150 mm and/or insertion length (A length) of 125 mm, suitable for on-site calibration with WIKA dry-well calibrator.
- Further neck tube lengths on request

For the customer, this reduces the stock-holding of measuring inserts, particularly for larger plants, through the use of uniform measuring insert lengths - even for different nominal tube sizes.

Pipe lengths TL and L1, thermowell insertion length U1

See table of dimensions

Sealing combination at neck tube (option)

The transition from the connection head for model TR22-B to the thermowell is effected via an optional sealing combination (polyurethane) of flat gasket and wiper. This combination permanently prevents the penetration and depositing of humidity and impurities in this area (IP68). Additionally, the sealing combination simplifies the cleaning process significantly.

In combination with the patented BVS head (patent, property right registered under no. GM 000984349) and the hygienic cable gland, an easy to clean and hygienic measuring location results, even in non-wetted areas. The BVS head is designed in such a way that cleaning agents can run off easily and that no residues can accumulate on the case.

2) All thermowells of this series that are internally pressurised, with a nominal diameter (DN) > 25 mm, are manufactured and tested to Module H of the Pressure Equipment Directive.

Hygienic design

The patented hygienic design of the TW61 flow-through housing enables dead-space minimised, invasive temperature measurement and a flexible mounting position through self-draining.

Approvals

Logo	Description	Country
	<p>EU declaration of conformity Pressure Equipment Directive PS > 200 bar, module H, pressure accessory</p> <p>For thermowells > DN 25 (1") and for the associated marking on the measuring instrument or thermowell, WIKA confirms conformity with the Pressure Equipment Directive in accordance with the conformity assessment procedure, module H.</p> <p>For thermowells with nominal widths of \leq DN 25 (1"), a CE marking in accordance with the pressure equipment directive (PED) is not permitted and therefore, they are designed and manufactured without CE marking in line with the applicable sound engineering practice (PED article 3, chapter 3).</p>	European Union
	<p>EAC (option) Import certificate</p>	Eurasian Economic Community
-	<p>MTSCHS (option) Permission for commissioning</p>	Kazakhstan
	<p>3-A (option) ¹⁾ Sanitary Standard</p>	USA
